

ALOE

OVERVIEW

Popular succulent that be grown in low water outdoor gardens, patio containers, or indoor plants. Fleshy, toothed foliage can be used topically to treat burns and skin irritation, but is toxic to people and pets if ingested.

WATER

Prefers for the soil to dry out between waterings.

LIGHT

Full Sun, but benefits from afternoon shade in hot and dry environment. Thrives indoors in a sunny window.

SOIL

Prefers lean well drained soil.
