

JUNCUS

OVERVIEW

Clump forming, grass like plant produces upright and arching foliage. The graceful bunches look lovely in mass plantings or to add texture to mixed gardens, especially along ponds and water features. Evergreen plants will get brown tips in the winter but can be trimmed up in the spring to look cleaner if desired, but isn't necessary.

WATER

Plants prefer frequent and consistent water and prefer saturated soil. Apply irrigation frequently.

LIGHT

Full sun

SOIL

Plant prefers consistently moist garden soil and thrives in several inches of standing water.
