

VERONICA

OVERVIEW

Low maintenance herbaceous perennial that produces attractive foliage and spikes of beautiful flowers. Pollinator friendly and long lasting cut flower. Plants are popular for formal and informal gardens alike.

WATER

Moderately drought tolerant once established. Water regularly during the first growing season, but once it is well established it only needs supplemental water every few weeks during the dry season. However, slightly more water during the dry season will produce more blooms.

LIGHT

Full Sun

SOIL

Plants prefer, rich, loamy well drained soil.
